

New survey reveals need for better information about **abortion**

Huge support for a **woman's right to know**

89% of British adults support “a woman’s right, enshrined in law, to be informed of all the physical, psychological and emotional risks associated with abortion.”

82% support “a legal duty on doctors to provide access to advice and information about alternatives to abortion, such as adoption.”

78% support “a compulsory cooling off period between diagnosis of pregnancy and an abortion, to ensure that the mother is sure of her decision.”

Huge **ignorance** over the scale of abortion

Last year there were more than **200,000 abortions** in Britain, yet **only 3%** of British adults estimate the actual number within 50,000.

Indeed, **nearly a third of people (30%)** estimate that the annual total is less than a tenth of the actual figure and a further **4 in 10 people** admit that they **don't know**.

When the true figure is revealed, **62%** of people say that it is “**too high** and ways should be found to reduce it.”

Support a **new debate**. Support ‘**informed consent**’.

Abortion: explain **all** the consequences and alternatives
